

21' CrossFire • Family Ski Boat

The CrossFire is bringing the fast hot rod style back to family recreation. In the 70's family ski boats had style, low profile, small and sporty. The New CrossFire is an exact clone of our 21' Ski Race Boat, with a few exceptions; more seating, more storage, standard lay-up, and all the style and performance of a raceboat, yet designed for the family.

The CrossFire is designed as an entry level Nordic. If you have been considering a family ski boat, then the CrossFire is the perfect choice.

All Nordic Boats are built with full composite construction; closed cell foam coring, vinylester resins and all the finest materials.
