The Thor is Nordic Boat's hot rod. If you are you looking for serious performance on the lake or river, then the Thor is your hot rod on the water. The Thor commands center stage wherever it may be. This boat is evidence of Nordic Boat's dominance in performance tunnel design. The Thor's behavior is tempered by a sound hull design. The tunnel platform smooths out rougher water inspiring confidence, a well-mannered boat.

The Thor, like you, craves high speed! It will get your adrenaline pumping and will take you were you want to go quickly!

All Nordic Boats are built with 100% Wood Free construction, closed cell foam coring, vinylester resins and all the finest materials. It all comes together and gives you the best product our expert team of craftsmen can produce.

Choose Standard, Sport or Full Race Kevlar/Carbon Lay-ups. Wood Free construction translates into a stronger yet lighter and faster, more fuel efficient boat for your money.

With over two years of research and decades of experience to draw from, the 27' Thor Open Bow has finally emerged as the ultimate family tunnel boat.

It has the looks and the ride of a cat but behaves like a V-bottom. The new bottom on the 27' Thor open bow tames big lake chop like it's predecessor yet provides a softer and more predictable ride when travelling at family speeds. Unlike others in it's class, it steps up and planes quickly, accelerates without porpoising and most importantly it turns and leans "in" like a V-bottom! You'll feel just as comfortable pulling a skier as you will travelling at cruising speeds!

For those wanting to bring friends, the new Thor Open Bow has a large cockpit with race style buckets, built in ice chests and loads of storage. Add to that a walk-thru open bow with recliners and you have an amazing fusion of design and function. The 27 Thor OB stands alone with it's unique styling, design and attention to detail.

All Nordic Boats are built with 100% Wood Free construction, closed cell foam coring, vinyl ester resins and all the finest materials. It all comes together and gives you the best product our expert team of craftsmen can produce.
