## 28 SuperSport O/B: Poker Run & Race Series

There are leaders, and there are followers... Nordic has always lead the pack in performance boat design and styling. Since its introduction, the progressively designed 28 SuperSport, has taken the lead and it is indeed an exciting boat to drive!

۲

This boat embraces a level of sophistication in design, execution, and substance that is impressive at every level. The sculpted glass cockpit is splendidly shaped, contoured, and cantered to specific tasks. It surrounds and envelops the driver, making him the center of its vast universe. Overtly angled switch and gauge panels and shapely pods, a vibrant and dazzling array of beautifully orchestrated interior billet; all contribute to the overwhelming sense of something extraordinary.

Overall boat length with motor	Notes
Beam length	
Approximate weight less power 4,700	
Fuel capacity	
Deadrise at transom
